EDUCATION

Iowa State University

Expected May 2027

Bachelor of Science in Computer Engineering

Ames, IA

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Software Development, Object-Oriented Programming, Machine Learning, Principles of Artificial Intelligence, Computer Architecture, Discrete Math

SKILLS

Languages: Java, Python, Go (Golang), TypeScript, JavaScript, C/C++, SQL

Frameworks/Libraries: Spring Boot, Flask, React.js, Node.js, Angular, REST APIs, OpenCV

Developer Tools: Docker, Google Cloud Platform, MongoDB, MySQL, Git, GitHub, Linux, Codex

EXPERIENCE

Motorola Mobility LLC

May 2026 – Present

Technical Product Manager Intern

Chicago, IL

- Developed a full-stack monetization platform enabling **7+ business teams** to review on-device apps and services
- Engineered a virtual device UI with **React.js**, **Redux**, and **Material UI** to test **6+ models** across **15+ carriers** without requiring physical hardware
- Optimized a **Flask REST API** with **MongoDB** and **OAuth 2.0**, reducing load times by **65%+**
- Deployed services with **Docker** and **Google Cloud Run**, automating CI/CD for **50+ internal users**

Motorola Mobility LLC

June 2025 – July 2025

Product Operations Engineering Intern

Chicago, IL

- Optimized Moto Migrate app reliability, reducing transfer failures by **15%+** across **4.5M+ users**
- Modernized transfer logic using **Java**, **Spring Boot**, and **Spring Data JPA** to improve migration error handling
- Validated **40+ Android and carrier builds** using **ADB** and **Fastboot**, identifying **12+ defects** before release
- Prototyped a cross-device AI experience in **Figma**, advancing it to executive approval with a projected **\$13M+ revenue opportunity**

Iowa State University IT Solution Center

Jan. 2025 – May 2026

IT Support Specialist

Ames, IA

- Resolved **50+ weekly** system, network, and endpoint incidents using **Microsoft Entra**, **Cisco DNA**, and **ServiceNow**, supporting reliable campus technology for students, faculty, and staff

PROJECTS

NerdMarket | Java, Spring Boot, JPA/Hibernate, MySQL

[GitHub Repo](#)

- Built a stock-market-style trading card marketplace with live pricing, portfolios, search, and card discovery
- Unified **3 card APIs** into a **90K+ card** database and added **OpenCV** scanning to match photos with listings
- Implemented real-time marketplace chat with **WebSockets** and persistent message storage
- Automated card price tracking and alerts with scheduled backend jobs

Autonomous Navigation Robot | C, Python, Matplotlib, NumPy

[GitHub Repo](#)

- Programmed an autonomous robot in **C** using IR, ultrasonic, and bump sensors to map and avoid obstacles
- Calculated object distance, angle, and width from sensor data to map the surrounding environment
- Streamed live scan data over **TCP** to support real-time obstacle visualization
- Developed a multithreaded **Python GUI** to visualize real-time sensor data and autonomous navigation

LEADERSHIP EXPERIENCE

Iowa State Ultimate Frisbee Club | Captain/Vice President

May 2024 – Present

- Directed operations for a 78+ member club, owning budget, travel, sponsorships, and fundraising
- Drove 50%+ YoY growth in membership and turnout by closing recruitment gaps and adding partnerships
